

COOPERATIVE ECONOMIC INSECT SURVEY REPORT
Glenn A. Salsbury, Survey Entomologist

Report 1, Volume 52
18 February, 2005

WHEAT INSECTS

HESSIAN FLY: Reports are beginning to come in of heavy to severe Hessian fly infestations. The problem is known to extend from west of Dodge City to Wichita. One field checked in Kiowa County had 10% of the tillers infested. A high percentage of wheat is being planted to susceptible varieties.

ARMY CUTWORM: No problems have been reported in either wheat or alfalfa.
